

# James Ian Bayonas

Dipolog City, Philippines | [Github](#) | [LinkedIn](#) | (+63) 956-641-5969 | jamesianbayonas21@gmail.com

## EDUCATION

**Dipolog Medical Center Incorporated**  
*Bachelor of Science in Information Technology*

**Dipolog City**  
*Graduation Date: Aug 2027*

## TECHNICAL SKILLS & INTERESTS

**Languages:** JavaScript, TypeScript, C#, PHP, SQL, HTML/CSS  
**Frameworks & Libraries:** React (18/19), Next.js, ASP.NET Core (.NET 8 Web API), Laravel (11/12), Node.js, Express.js, Inertia.js, Tailwind CSS  
**Databases & ORMs:** PostgreSQL, Supabase, MySQL, Microsoft SQL Server, Entity Framework Core, Dapper Micro-ORM, Eloquent ORM  
**Developer Tools & AI:** Git, Docker, WebSockets (Socket.io, Laravel Reverb), AI Automation (Google Gemini API, Ollama/LLaVA), Tesseract.js OCR, Open-Meteo API  
**Interests:** Chess, AI Automation, Machine Learning, Deep Learning, Reading, Working Out, Biking, Fishing, Mathematics.

## DEVELOPMENT EXPERIENCE

**DormFix (Dormitory Management System) | [Live Demo](#)** **Dipolog City, PH**  
*Full-Stack Web Developer* *Nov 2025 - Present*

Engineered an automated utility and rent payment audit pipeline using **Tesseract.js** OCR and **local Ollama LLM** parsing in **Node.js**, achieving **zero-latency anomaly flagging** on bad receipt uploads.  
Built socket-driven bidirectional chat channels with **Socket.io**, **React Context API**, and **MSSQL**, enabling **sub-second real-time messaging** between landlords and tenants.  
Developed an automated emergency ticket classification service powered by **local LLM triage** and **Nodemailer** to ensure **immediate routing** of high-priority maintenance alerts.

**IsdaLog Ecosystem (Catch Logging Logistics) [Live Demo](#)** **Dipolog City, PH**  
*Backend & AI Engineer* *Feb 2026 - Present*

- Architected a zero-typing maritime catch logging Telegram bot in **Node.js**, integrating **Google Gemini Flash API** with local **Ollama LLaVA fallback** to enable **instant multi-modal species identification**.
- Streamlined live fish auctions across connected buyers by building a **Laravel 11** backend service that broadcasts real-time bid updates via **WebSockets** and **Laravel Reverb**.
- Implemented automated BFAR compliance and safety warning algorithms by combining SQL geospatial catch tracking with Open-Meteo weather API integrations.

**PharmaLink Pharmacy Management System | [Live Demo](#)** **Dipolog City, PH**  
*Full-Stack Web Developer* *Nov 2025 - Present*

- Integrated a **React 18** frontend with a **.NET 8 C# Web API** using **Dapper micro-ORM**, processing high-volume POS transactions with **zero-data-loss atomic inventory deductions**.
- Enforced zero-trust authorization across Admin and Pharmacist views by engineering **JWT authentication pipelines** and custom **C# role-based middleware guards**.
- Accelerated inventory monitoring and low-stock tracking by leveraging **React lazy-loading**, **Recharts visualization**, and **Tailwind CSS** to maintain **near-zero UI rendering latency**.

**CentraLog (Institutional Asset Tracking System) | [Live Demo](#)** **Dipolog City, PH**  
*Full-Stack Web Developer* *Jun 2026 - Present*

- Designed a Strategy Pattern depreciation engine (Straight-Line & Double-Declining) in **.NET 8**, maintaining **100% asset valuation accuracy** during dynamic maintenance windows.
- Eliminated transactional race conditions during multi-facility hardware transfers using **EF Core retrying execution strategies**, **automated custodian reassignment**, and **immutable audit logs**.
- Developed a preventative maintenance background daemon paired with a **React 19 SPA**, delivering **sub-60-second health degradation alerts** and **batch QR code generation**.
